Objective: Enhancing Employability of Students to Ensure Significant, Measurable Increase in Employability of student

A comprehensive skill development model has been developed that will have the elements of English Communication, Digital/ Computer Skills, Analytical Skills, Financial Literacy, Legal Literacy, Entrepreneurship, Leadership Development and soft skills and also, will add on a specialization in a specific domain skill to make the graduating youth employable. This programme will subsume Jawahar Knowledge Centre (JKC).

The following courses are highly relevant for students to become employable.

1. **English Communication:** Communication is the key differentiator in today's job market. Any "Good" job in India or elsewhere needs good communication skills preferably in a language widely spoken and understood worldwide and this language happens to be English. English Communication has become the language of the world. More importantly, the rise of Service industry in India has made it an imperative to prepare a workforce that is very well conversant in English. The English Communication Course will enable students to understand and respond to spoken language, learn how to speak fluently and use appropriate expressions, read and comprehend different kinds of texts for different purposes and write coherently and effectively in formal and informal contexts.
2. **Digital Literacy or Computer Skills:** Nowadays, it is important for students to have basic knowledge about Computers and Information Technology (IT) because computers are used practically everywhere. It happens very often that employers hire people who are able to use PCs and may reject those who do not have at least basic computer skills. As a result, it is becoming more and more significant especially for students who study and work to develop their capability in using computer technologies. This course will provide the students with meaningful opportunities to interact with the digital medium and acquire skills that prove them employable.
3. **Analytical Skills:** Student's ability to examine information or a situation in detail in order to identify key or important elements, their strengths and weaknesses and use these to compile a persuasive argument, make recommendations or solve a problem is highly valued by the employers. Therefore, it is important to develop analytical skills in students so that they could respond to day-to-day challenges at workplace or elsewhere.

1. **Youth Leadership and People Skills:** Knowing that our youth are soon to enter the world of work, the two threads that weave the different topics together are firstly the notion of self and agency, upholding dignity of self and others; and secondly, embodying values for fairness and their action in future. Overall, the Youth Leadership and People Skills (YLPS) Course will take the student on a journey of self-discovery, awareness of one's own power and agency while simultaneously valuing diversity, becoming aware of what one does and the results that come forth, and to solve problems in an interdependent and systemic manner.
2. **Financial Literacy:** Financial Literacy is the ability or understanding to make informed judgments about money or financial services that are suited to one's needs. Giving knowledge inputs on finance and financial products is the key to helping people make informed decisions. It is well established that there is a direct correlation between people who have low levels of literacy and financial difficulties they face. So, increasing literacy and numeracy is important in making people understand financial products / services.
3. **Legal Literacy:** It is important to empower citizens through education. Legal literacy is a short course that is useful in developing a basic understanding of the Indian legal system and laws, as would apply to an ordinary person. It is extremely important in empowering the students with basic rights and enlisting their involvement in ensuring rule of law and good governance.
4. **Introduction to Entrepreneurship:** This is an introductory module designed for all the students. This course provides an opportunity for the students to appreciate and understand the core of entrepreneurship. The topics covered include: understanding of the self, goal setting, working in team, and key process in entrepreneurship. The core process in entrepreneurship and an individual's journey to entrepreneurship/decision to become an entrepreneur is introduced by creating an environment of experiential learning through games, role plays and field works. Using contextual materials and proven methods, the students learn the core elements in entrepreneurship and how entrepreneurs think and act.

5.1.3 PERSONAL COUNSELLING (2017-18)

In an official circular, the University Grants Commission (UGC) has directed all higher education institutions and universities to set up student counselling system. The circular said that the directive was based on the guidelines Safety of Students on and off campuses of Higher Educational institutions. One of the important components of the guidelines was that all the higher education institutions should mandatorily put in place a "Students Counselling System" for the effective redressal of problems and challenges faced by students, said the circular.

It should be a unique, interactive and target-oriented system, involving students, teachers and parents to address common student concerns ranging from anxiety, stress, fear of change and failure to homesickness and a slew of other academic worries, said the circular. It should bridge formal as well as communicative gaps between the students and the institution at large. The counsellors appointed must stay in touch with students throughout the year.

Teacher counsellors, trained to act as the guardians of students at the college level, should remain in close touch with the students allotted to them throughout the year, cater to their emotional and intellectual needs and guide them to move up in their career at regular interval of time. Teacher counsellors can coordinate with wardens of hostels and exchange personal details of students, academic record and behavior patterns for prompt pre-emptive or corrective action. Besides, the Students Counseling center in university or colleges affiliated to your university where the services of a trained psychologist may be availed as and when required.
